2 - What has been particularly effective about Sean Mcculloch's approach to teaching in this course?

Response Rate	10/29 (34.48%)
• His availability to help and always giving us useful feedback- Best TA in the Econ department- Sean's the Goat • Particularly helpful in Stata • Sean was very accessible during office hours and provided really helpful feedback on assignments • Gives excellent and clear feedback on work • He was very helpful during his TA/office hours. • - Provided specific feedback to students - Balanced the need to provide code and other resources to students who are relatively new to Stata / economic research with providing the space for students to be challenged and grapple with coding tasks on their own - Very approachable and willing to meet outside of class - Provided a comprehensive final project and developed a handout to guide assignment tasks for each week of the final project • He was helpful in section. It was nice that he provided his code for some assignments because it would have been very hard for me to get there on my own. • N/A • Sean was great, from the sections I went to he was always ready to answer and help us. • Sean has been super approachable and knowledgeable about the class material.	

3 - What specific advice would you have for Sean Mcculloch about changes that would enhance your learning?

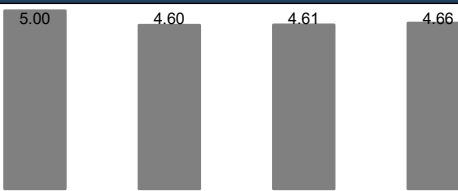

Response Rate	8/29 (27.59%)
• none • N/a • N/A • n/a • In section, Sean could do a better job of having more awareness of the pace at which he is moving through content -- particularly coding topics. In some cases, students may be entirely unfamiliar with the coding strategy covered, and it could be worthwhile to move a bit slower and ensure that students have tracked the logic before moving on to the next topic. • Sean explained the data sets, regressions, and code for final project, but I think he could have explained it more clearly. • N/A • No.
